Solar Panels Permit Guide

A building permit is required for any solar panel installation with an aggregate face area ("face area" includes the aggregate area of all panels or modules) of 5 square metres (54 square feet) or greater, that is mounted to a building or structure.

Additionally, a permit is required when the solar panel(s) is designed to provide hot water or to provide primary or supplementary heating.

A building permit is **NOT** required for solar collector systems installations where:

1. the panel is less than 5 sq m (50 sq ft) in area
2. the panel is not installed on a building
3. is not connected to a plumbing system
4. is not connected to a mechanical heating system

Existing buildings must be evaluated by an engineer for the extra load the solar panels apply to the roof assembly. Solar panels may add dead loads to the structure and can cause extra wind uplift and live loads, such as snow accumulation, due to the placement of the panels. Transfer of loads through the panel mounting system may cause a relocation of where and how the loads are applied to the roof assembly (uniform and/or point loads). If insufficient capacity is identified, the system would have to be strengthened.

Electrical permits and/or inspections available from the Electrical Safety Authority (ESA) may also be required where the system has electrical connections. If you have a grid-connected PV system, the ESA must inspect it before it is turned on in most cases.

This permit guide provides a summary of the Building Permit submission requirements for the installation of Solar Panels and has been developed for convenience purposes only. The property owner is responsible for ensuring compliance with all Central Elgin By-laws, other applicable laws, and the Ontario Building Code.

Required Documents

1. Applicable Laws Checklist (In many instances, before a building permit application can be processed and a permit issued, there are other approvals from other agencies that are required. These approvals are not administered by the Building Division and are required as part of a complete application package. Please consult the applicable law checklist prior to applying for a building permit.)
2. Application to Construct or Demolish
3. Owner Authorization Form (if the applicant is not the registered property owner)
4. Commitment to General Review Form

Drawings / Specifications

1. Building Plans – Complete set of construction drawings drawn to scale, including:
 - a. Roof Plan showing the location of the proposed solar collectors, including dimensions, the number of panels, and the type of construction used for the existing roof (i.e.

- engineered trusses at 24" o.c., or label the size and spacing of roof rafters/joists)
- b. Engineering details for the solar collectors including their connection to the existing roof, and confirmation from a structural engineer that the impact of the installation of the collector and associated equipment will not adversely affect the existing roof structure
 - c. Solar panel manufacturer specifications
 - d. Pre-manufactured mounting rail system manufacturer specifications
 - e. Supplementary construction if upgrades are required by Professional Engineer
 - f. Identify size and location of all supports or bracing to be provided to existing systems
 - g. Confirm all loads are sufficiently transferred to footings

How to Apply:

Step 1: Review and complete the Applicable Laws Checklist.

Step 2: Complete the required forms (see above/attached) and apply for a permit by submitting the forms and all required documentation in person or online through Cloudpermit. Please refer to our [website](#) for online submission instructions.

Once received the application will be reviewed for completeness and compliance with the Ontario Building Code and Applicable Law. Application review comments are provided during review to identify any outstanding requirements. A permit will be issued when the review is complete, and all fees are paid.

Construction may commence and required inspections requested once the permit is issued. When all required inspections are completed and requested documentation submitted, the permit will be closed.

Applicable Law Checklist

This form is used to confirm approvals from other agencies that are required before a building permit can be issued.

Project Address: _____

The *Building Code Act* prohibits the issuance of a building permit if the proposed construction or demolition will contravene any applicable law as defined by the Building Code. The questions below will help you to determine if an applicable law applies to your project. Timeframes for building permit review cannot be established until all required applicable law approvals have been received and the associated documentation submitted to the Building Department.

If you answer 'yes' to any of the following questions, please ensure that the approval documents issued by the relevant authority/agency are submitted with this permit application. Approval documents that are required but have not yet been received from the relevant authority/agency, must be acknowledged in the declaration located on the bottom of this form.

Applicable Laws & Building Permits - Additional Information

In many instances, approvals are required from other agencies and authorities to ensure that a development can be safely and suitably accommodated on a proposed site. The requirements and regulations associated with these approvals can have significant impact on the design parameters of a project, so it is important that they are completed prior to applying for a building permit. Fully complete building permit applications are given priority by law and are less likely to have their review timelines impacted by the requirements and changes resulting from these other processes.

Zoning & Planning

Contact: Central Elgin Building Department at 519-631-4860 ext. 284 / Central Elgin Planning Department at 519-633-2560 <https://www.centralelgin.org/en/building-and-development/planning-and-development.aspx>

Planning Act, s. 34, 34(5), 45 and Part VI

Zoning by-laws restrict things such as land use, lot size, building size and setbacks. If your project does not comply with the relevant sections of the zoning by-law, a minor variance or rezoning must be applied for and granted before any building permit can be issued. Zoning by-laws can also be used to restrict the issuance of building permits until an associated planning application (such as land division or subdivision) has been completed, or, until municipal servicing has been made available.

Planning Act, s. 41

Site Plan Approval is required for most new industrial, commercial, institutional and multi-residential buildings and additions. A finalized site plan, and site plan agreement must be registered on the title of the property before a building permit can be issued. Houses, residential accessory buildings and agricultural buildings are exempt from this process.

Design Requirements

Contact: Ontario Association of Architects www.oaa.on.ca or Professional Engineers Ontario www.peo.on.ca

Architects Act R.S.O. 1990 or Professional Engineers Act R.S.O. 1990

Certain buildings require design and general review by an architect and/or a professional engineer. Stamped design documents and 'Commitment to General Review' forms must be provided prior to the issuance of any building permits.
